

THE RADIOVISION ELETRONIC NETWORK/
ANALOG OUTPUT/ VIEWING SYSTEM

THE RAVEN

ONE CLAIM ONLY

New

7. A method for broadcasting audio and slow scan video simultaneously from the same broadcast station.

Whereby using any ordinary broadcast receiver plus any stand alone Slow Scan TV Converter.

Providing audio in stereo or not and slow scan video, said method will enable radio stations to broadcast audio and slow scan video at the same time over the air within the bandwidth that is allowed by the agency that regulates broadcast communications.
